ABSTRACT. *Orthotrichum moravicum* Plášek & Sawicki, sp. nov., is a confirmed record of a new species from the Czech Republic. The new taxon is described in subgen. *Pulchella* and illustrated by photos. Molecular data indicating the phylogenetic placement of the species are presented, indicating a sister relationship with *O. pallens*.

KEYWORDS. *Orthotrichum moravicum*, *Orthotrichum scanicum*, *Orthotrichum vittii*, *Orthotrichum pallens*, mosses, new species, taxonomy, Czech Republic.
